How to calculate your 2015-16 EIU/UPI dues!

Here's how UPI's yearly dues for bargaining unit members are calculated

1. Take the member's annual base salary and multiply it times 0.6%;

2. Any member whose base salary is $57,861.00 or more will pay the total amount that UPI pays to its affiliates, $580.10, in addition to the amount in #1.

   OR

3. Any member whose base salary is less than $57,861.00 per year but more than or equal to $14,889 will pay $309.27 in affiliation dues in addition to the amount in # 1.

   OR

4. Any member whose base salary is less than $14,889 per year but more than or equal to $9,040 will pay $173.86 in affiliation dues in addition to the amount in # 1.

   OR

5. Any member earning less than $9,040 per year will pay $106.15 in affiliation dues in addition to the amount in #1.

6. Then divide the resulting total in line 2, 3, 4 or 5 by the number of a member's pay periods per year.

The formula would look like the following...

\[
0.6\% \times \text{base salary} + \text{affiliation dues} = \frac{\text{dues per Pay periods per year}}{\text{pay period}}
\]
