

Proposed Program Requirement Changes

Career and Technical Education (CTE) Business Education Emphasis

Visual Summary

Beginning in July 2004, content area certification tests will change. The new tests will be based on the recently adopted teacher education standards in Business, Marketing, and Computer Education. Tests will be relative to the goals and objectives expressed in the standards. In order to better align the CTE Business Education requirements to the standards and to assure that students will receive all the content on which they will be tested, it will be necessary to make slight adjustments in the courses that students are required to take.

The changes in course requirements are summarized below:
