Re: Proposals for the composition of CUPB

The Composition Subcommittee of CUPB has compiled three proposals to be reviewed and discussed by CUPB. All proposals advocate for reducing the size of CUPB while offering different options regarding constituencies represented.

The first proposal outlines two options which maintain the current constituencies represented by the Council.

The second proposal bases composition on the number of full-time employees within each Vice-President and President's Area.

The third proposal is based on the concept that each constituency in the Vice-Presidents' and President's Area would be represented equally.
