

# Color Overlay Plan

## Overview

The following **overlay plans** illustrate key features of the Campus Master Plan at the completion of the Ultimate Development Phase.

The **Vehicular Circulation** overlay illustrates vehicular circulation, building service and parking. The key elements of the proposed vehicular system include the development of inner and outer circulation loops, and the relocation of parking from the academic core of the campus to a zone between Seventh and Ninth Streets.

The **Pedestrian Circulation** overlay illustrates pedestrian paths, open spaces and linkages between them. The key elements of the proposed pedestrian system include the conversion of most of Seventh Street, and Garfield between Fourth and Seventh, into pedestrian concourses.

The **Campus Wayfinding** overlays illustrate vehicular & pedestrian wayfinding. A Pedestrian Message Schedule is also provided. The Vehicular Wayfinding overlay illustrates primary and secondary vehicular circulation routes, major visitor destinations, and locations for vehicular wayfinding signs. The Pedestrian Wayfinding overlay illustrates primary and secondary pedestrian circulation routes, major visitor destinations, and locations for campus directory maps and pedestrian wayfinding signs. The Pedestrian Message Schedule illustrates the organizational structure of the campus wayfinding system.

The **Site Utilities** overlay illustrates the proposed diagrammatic site utility lines for power, sanitary, storm water, steam, water and gas.
