The Alpha Chi Chapter of Pi Omega Pi at Eastern Illinois University has put together a Resource Guide to Computer Creativity. As students that are getting ready to go out into the teaching field, we thought it would be helpful to compile resources that can be used in a computer curriculum.

We gathered information from our peers in our methods classes. Through bulletin boards and activities assignments given to us throughout the semester, we have compiled them into a resource document for teachers.

We would like to thank each of our classmates for their creative ideas.
