Eastern Illinois University
Office of Internal Auditing Charter

The Office of Internal Auditing (Office) of Eastern Illinois University (University) functions in accordance with the State of Illinois Fiscal Control and Internal Auditing Act (FCIAA). FCIAA establishes a State Internal Audit Advisory Board who has adopted the Institute for Internal Auditing’s (IIA) Definition of Internal Auditing, Code of Ethics and International Standards for the Professional Practice of Internal Auditing (the Standards) which this office adheres to for guidance.

**Definition:** As defined by the IIA, “Internal auditing is an independent, objective assurance and consulting activity designed to add value and improve an organization’s operations. It helps an organization accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control, and governance processes.” The internal audit function is an integral part of the University’s control system. However, the internal audit review and appraisal process does not relieve other University personnel of the responsibilities assigned to them.

**Code of Ethics:** The Director of Internal Auditing (Director) and staff of the Office are expected to apply and uphold the principles of integrity, objectivity, confidentiality and competency as defined by the IIA.

**Authority:** FCIAA requires that the Director report to the President and have direct communications with the Board of Trustees (BOT). FCIAA also requires that all Office staff be free from all operational duties and have complete unrestricted access to all University records, property, electronic media and personnel relevant to the performance of their work.

**Responsibility:** The Office is responsible for providing the University's administrators and BOT members with information about the adequacy and the effectiveness of the University’s system of internal controls and quality of operating performance. To accomplish this responsibility, all institutional activities are subject to audit. The Office also conducts special projects as requested by administration and consulting services that are advisory in nature for the University community. The Office does not perform consulting services outside of the University.

The scope of internal auditing encompasses examining and evaluating the adequacy and effectiveness of the University's systems of internal control and the quality of operating performance against established standards in carrying out assigned responsibilities.

The Director is generally responsible for the administration of this charter and for functionally directing internal audit activities throughout the University. This includes submitting a flexible two-year audit plan for the President’s approval prior to June 30 and reporting to the President by September 30 the status of the completion of the prior year’s audits and outstanding issues.

University administrators are responsible for providing internal auditors with timely access to records, personnel, and physical properties which the Director has determined to be relevant and for making sure that prompt, pertinent and comprehensive responses are made to audit recommendations.

This charter was prepared by the Director and has been reviewed and approved by the following:

![Signature]
Dr. William L. Perry
President
