Thurman John Jones Jr., formerly of Newton, has been assigned for training to the Ordnance Replacement Training center at Aberdeen Proving Ground, Maryland. He will go through a four weeks basic training period where the new soldier is schooled in the fundamentals of defensive and offensive protection, chemical warfare, military sanitation, discipline and many kindred subjects. During this period, he will be under the close scrutiny of his officers and the classification officer. At the end of his basic instruction he will be assigned to a technical school or a more advanced

military training school.

In the technical training section the soldier is placed where his previous experience and aptitude best fit him: Among the sections are the following: Small arms, tank maintenance, automotive and artillery mechanics. There are many other technical schools he

may attend.

These new men are quick to realize the importance of their work and learn to keep uppermost in their minds the thought: "That a tank or gun repaired on the front lines and returned to action against the enemy is worth hundreds coming off the production lines back home."

The Ordnance Replacement Training center is under the command of Brigadier General Donald Armstrong
