

*Organization Is Cited for Its
Fine Work in India* 3/14/44

Mr. and Mrs. A. R. Ochs of near Newton received a letter recently from their son, Robert C. Ochs, who has about completed two years of service in India. He writes that he is in good health and is looking forward to a furlough back to the states this summer.

He also stated that his group had been given the Citation Award by the president for some work they had done there. This award being the highest given any organization.

This is probably the same citation mentioned by Joseph Gregoire of Newton, and is believed to refer to work done on roads and airfields in Northern India.
