KEEP IT GREAT! With the sure 5, 1945

## Colors

The following letter was written from Naples, Italy, to his mother by a soldier, known only to us as Maur-ice. It tells a novel phase of Army activities, hitherto secret. "I'm stationed at Naples just a de-

"I'm stationed at Naples just a at tachment of thirty-five of us. Fred from Peoria and I have been working down at the port ever since we've been in Italy. We hook up these big tank-ers with gasoline, 130,000 to 160,000 barrels, and we maintain all the in-stallations, five of them. These inbarrels, and we maintain all the in-stallations, five of them. These in-stallation consist of big tanks and pipe lines holding all the way from

pipe lines noticing all the way from 20,000 barrels to 80,000 barrels. "There's a lot of work connected in it keeping the pipe line repaired when there are leaks, repairing the valves, packing them, and replacing lots of them as it's all old line, eight, ten, and twelve inch line. We have a storage capacity of approximately ten, and twelve inch line. We have a storage capacity of approximately 3,000,000 barrels. We also set pumps to discharge cargo to the main docks and loading racks, where the soldiers get their supply of gas. Our line runs from here to Bologna which is about 700 miles. Our hows are settlered all from here to Dougan 700 miles. Our boys are scattered all the way from Naples to Bologna. Every ten miles or less, depending on the terrain, there's a pumping sta-tion, where there are three operators and a maintenance crew to repair the line in case of fire, or leaks. "The Italians are bad about tearing the line loose and getting gas, as it

c the line loose and getting gas, as it costs them \$5.00 a gallon on the black I F market, and they're always bringing in a bunch of them for stealing gas. I guess Fred and I have about the s a c a 1: iı ic t]

I guess Fred and I have about the most important job as it all depends on us for the gas to be unloaded and stored. I like the work fine. We are subject to call twenty-four hours a day in case of a leak or if a strong wind comes up and breaks the tanker loose and tears the line out. "We too have a lot of trouble with leaks as the Italians here loosen the flowage so they can get gas. We unload diesel, 80 and 100 octane gas, black oil and kerosene. We also have lines running to all airports fueling all the planes, and lines run-ning clear up to the front supplying the Fifth army, and other divisions and armies. a si is M H and armies. b

"There's so much that we do that I can't write it all, but can give you an idea. We have unloaded around P an idea. We have unloaded around 300 of these big 130,000 barrel tank-ers — English, American, French, Dutch, Belgian, practically all the na-tions ships. We have loaded up that many (300) or more 70,000 and 80,-000 and smaller ones to shuttle run up near the front, on islands, like Corsica, Sardinia, Capri and Ischia, where there are air fields and troops. Cŧ ti rc S w ti be n

u uvupa. "We build these 500 to 10,000 barrel tanks. Last Christmas I wrote and said we were out on a job, I was out on Ischia island building tanks for a submarine and PT boat base for refueling. These lines from Naples to Bologna were laid by us. Every twenty feet is a joint of pipe and 700 miles is a long way. They're laying a line through the Brenner pass now by Bologna. We are the only company that handles all products, the others only handle gas. Incidentally we were scheduled to go to Burma, but it fell to Japs just when we loaded at New York. We also run supply depots, gas racks where companies get their gas, and lots of other construction work. We did some type of work back in Africa and Algeria. I was stationed at Constantine.

1 "We probably will be here for some time and then go to the Pacific to do the same type of work. We were atlf tached to the Fifth army when we ( first came over. We handle several million barrels of gas each month. We were supplying the Air Corps t while they were doing all the bomb-S ing on Berlin, and Italy also all the d other various places. I was in Rome v two days after it fell. I have been b to Cassino and Anzio and several other places. I have a lot of pictures of them.

is "We are going up to Bologna one W of these days on pass. Leghorn is N really wrecked. We've been in Naples te for seventeen months, going on eighte teen. Th lines to the front consisted of four and six inch lines. The island of Capri is a very pretty place, also G You can see now what we've Ischia. been doing now for the past twenty p b months. Back in Bizerte we lived in pup tents and rain. I didn't know it could rain so hard."
