

Textbook Homework Policy

There will be regularly assigned textbook homework problems. Before attempting the homework problems, you are expected to read the sections carefully. You are strongly encouraged to discuss homework problems with your instructor, use the free math tutoring service, and work with your fellow classmates. However, you are expected to write up your own solutions. Hand graded homework will be collected regularly. The section, problems and due dates will be posted online.

Textbook Hand Graded Homework Procedures:

- ❖ Your name, date and homework information are to be written at the top of the first page.
- ❖ Multiple pages must be stapled together. No creative folding techniques. Otherwise, you will lose points for that day's homework assignment. Your instructor will not be responsible for lost pages if they are not stapled together.
- ❖ Your homework should be done on regular 8.5 x 11 inch notebook paper.
- ❖ You may write on both sides, but be sure to mark where a new section begins. Please, no fringes!
- ❖ Each problem should be written out (you will find this helpful when you go back to review) and the problem number clearly marked.
- ❖ Each problem is to be done with all intermediate steps neatly written and complete. Written explanations in full sentences must be included whenever appropriate, using proper grammar, usage and syntax for both English and symbolic mathematics.
- ❖ Correct answers with no supporting work will not receive credit.
- ❖ Handwriting must be legible. You will not be given credit for problems that cannot be read. You also have the option to type up your homework, see me for downloading Latex.
